

Project : Human body systems

For the final project in this unit you and your partner will create a poster, model or presentation that explains information about two major body systems.

Your assigned systems are _____ and _____.
(these were drawn in class)

It should include information about the following:

Describe how these systems interact with each other in a model, poster or a presentation. Posters/ presentations must include pictures, diagrams, videos and/or other visual aids.

Be sure to include:

- Functions of each system? **Explain** how any are shared. _____/20
- Organs in each system (min. of **5** per system) _____/10
- Stimuli and responses in the systems (min. of **3**) _____/15
- Transport within the systems - what is transported and how? _____/10
- How your body maintains homeostasis within the systems
- include at least **two** examples per system _____/10
- Specialized cells in each system (min. of **2** per system) _____/10
- Disorders or diseases that affect **both** systems (min. of **3**) _____/15
- Neatness and creativity _____/10
- Total** _____/100
